

PROFESSIONAL SUMMARY

Software Engineer with 5.8+ years of experience building scalable cloud-native systems using Java, Spring Boot, Microservices, AWS, Kafka, Redis, Docker, and Kubernetes. Proven track record in distributed systems and real-time analytics, including designing event-driven architectures and integrating AI/ML services. Recently delivered a real-time analytics platform at Verint that reduced agent call resolution time by an estimated 40% through OpenAI-powered call summarization. Skilled in system design, performance optimization, and end-to-end delivery in Agile environments. Seeking senior backend or platform roles where I can leverage my expertise in cloud and AI technologies.

EXPERIENCE

VERINT SYSTEMS

SOFTWARE ENGINEER

MAY 2024 – PRESENT

- Architected and developed cloud-native microservices using Java, Spring Boot, gRPC, and Reactor for real-time interaction analytics supporting 100+ customer service agents.
- Built AI-powered call summarization capabilities using OpenAI APIs, reducing call wrap-up time by 15 percent.
- Designed and implemented Kafka-based event streaming pipelines processing 10,000 messages per second.
- Created automated testing frameworks using JUnit and Mockito, achieving 95 percent test coverage and improving deployment reliability.
- Automated CI/CD pipelines with Harness and Docker across 10+ microservices, reducing release times by 50 percent.
- Implemented Kubernetes autoscaling and supported AWS migration initiatives, improving infrastructure efficiency by 30 percent.
- Established Datadog monitoring and alerting, reducing incident recovery time by 20 percent.

ARCADIA

SOFTWARE ENGINEER II

MAY 2023 – MAY 2024

- Architect interactive energy analytics dashboards using Java, Spring Boot, AWS S3, and AWS EC2, serving over 500 users and enhancing data visibility.
- Built automated ETL pipelines to ingest data from Excel and Google Sheets, reducing reporting effort by 70 percent and improving billing accuracy.
- Implemented Spring Security and JWT-based authentication while enhancing AWS security controls, achieving zero reported security incidents.

CGI

SENIOR SOFTWARE ENGINEER

SEP 2022 – MAY 2023

- Architect and developed scalable microservices using Java and Spring Boot, enabling a 50 percent increase in daily transaction throughput while improving API performance by 30 percent.
- Enhanced system observability and reliability through Spring Boot Actuator integration and custom health monitoring, reducing production incidents by 25 percent.
- Mentored two junior engineers and drove architecture reviews, coding standards, and code quality initiatives across the development team.
- Partnered with product, QA, and security stakeholders to deliver high-performance financial applications and eliminate critical security vulnerabilities.

CGI

SOFTWARE ENGINEER |

APR 2021 – SEP 2022

- Designed and implemented microservices and API Gateway integrations, enabling a 50 percent increase in request volume while enhancing scalability and system resilience.
- Improved front-end performance through Angular optimization techniques, including lazy loading and code splitting, reducing page load times by 40 percent.
- Collaborated with Agile teams to deliver high-quality software releases, achieving a production bug escape rate below 5 percent through rigorous testing and code reviews.

TECHNICAL SKILLS

- Languages:** Java
- Frameworks/Libraries:** Spring Boot, Spring Security, Hibernate, JPA, REST APIs, gRPC, Reactive Programming
- Architecture & Design:** Microservices, Distributed Systems, Event-Driven Architecture, API Gateway, System Design
- Cloud & DevOps:** Amazon Web Services (AWS), Docker, Kubernetes, Jenkins, Harness, Git, Maven, CI/CD
- Databases & Caching:** Oracle, MySQL, Redis
- Messaging:** Apache Kafka
- Observability:** Prometheus, Grafana, Datadog, Spring Actuator
- Frontend:** Angular
- AI & Automation:** OpenAI APIs, Prompt Engineering, LLM Integration, AI Integration
- Practices:** Agile/Scrum, TDD/Unit Testing, Integration Testing, Code Reviews

EDUCATION

- Jawaharlal Nehru Technological University Hyderabad [JNTUH]
Bachelor of Technology | Information Technology | | Aug 2016 – Sep 2020
- Abhinav College of Science, **MH Board** | *April 2014 – May 2016*
- The Saraswati Vidyalaya, **MH Board** | *March 2013 – March 2014*

CERTIFICATION

- PG** in Java Full stack Product Engineering | *November 2020 – April 2021*
- Cisco Certified Network Associate (**CCNA**) | *May 2020*
- Oracle Structured Query Language (**SQL**) | *March 2019*
- Core Java | *March 2018*
