PROFESSIONAL SUMMARY

Research & Development Engineer with 5.9 years of experience building scalable, cloud-native backend applications and user-facing features using Java, Spring Boot, Microservices, Kafka, Redis, AWS, Docker, and Kubernetes. Experienced in designing distributed and event-driven systems, real-time analytics platforms, and AI-powered capabilities using OpenAI APIs. Strong background in system design, REST APIs, performance optimization, observability, CI/CD, and end-to-end software delivery. Built solutions supporting 100+ customer service agents and Kafka-based pipelines processing up to 10,000 messages per second.

TECHNICAL SKILLS

Languages: Java (8, 11, 17), Multithreading, SQL, Go (Basic)

Backend & Frameworks: Spring Boot, Spring Security, Hibernate, JPA, REST APIs, gRPC, Reactive Programming, Reactor,

Architecture: Microservices, Distributed Systems, Event-Driven Architecture, API Gateway, System Design, Design Patterns

Cloud & DevOps: AWS (EC2, S3, API Gateway, IAM, Amazon MSK, ElastiCache), Docker, Kubernetes, OpenShift, OKD

CI/CD & Build Tools: Jenkins, Harness, Git, Maven, Gradle

Messaging & Caching: Apache Kafka, Redis

Databases: MySQL, Oracle

Observability: Datadog, Prometheus, Grafana, Spring Boot Actuator

Frontend: Angular, TypeScript

AI & LLM: OpenAI APIs, LLM Integration, Prompt Engineering

Testing & Practices: JUnit, Mockito, Unit Testing, Integration Testing, TDD, Agile/Scrum, Code Reviews

PROFESSIONAL EXPERIENCE

VERINT SYSTEMS

May 2024 – Present

Software Engineer

- Architected and developed cloud-native microservices using Java, Spring Boot, gRPC, and Reactor for real-time interaction analytics supporting 100+ customer service agents.
- Built AI-powered call summarization capabilities using OpenAI APIs, reducing agent call wrap-up time by 15%.
- Designed and implemented Kafka-based event streaming pipelines processing up to 10,000 messages per second.
- Created automated testing frameworks using JUnit and Mockito, achieving 95% test coverage and improving deployment reliability.
- Automated CI/CD pipelines with Harness and Docker across 10+ microservices, reducing release times by 50%.
- Implemented Kubernetes autoscaling and supported AWS migration initiatives, improving infrastructure efficiency by 30%.
- Established Datadog monitoring and alerting, reducing incident recovery time by 20%.

ARCADIA

May 2023 – May 2024

Software Engineer II

- Architected and developed interactive energy analytics dashboards using Java, Spring Boot, AWS S3, and AWS EC2, serving over 500 users and improving data visibility.
- Built automated ETL pipelines to ingest data from Excel and Google Sheets, reducing reporting effort by 70% and improving billing accuracy.
- Implemented Spring Security and JWT-based authentication while enhancing AWS security controls, contributing to zero reported security incidents.

CGI

Apr 2021 – May 2023

Senior Software Engineer (Sep 2022 – May 2023)

- Promoted from Software Engineer to Senior Software Engineer based on increased technical ownership and responsibilities.
- Architected and developed scalable microservices using Java and Spring Boot, enabling a 50% increase in daily transaction throughput and improving API performance by 30%.
- Enhanced system observability and reliability through Spring Boot Actuator integration and custom health monitoring, reducing production incidents by 25%.
- Mentored two junior engineers and drove architecture reviews, coding standards, and code quality initiatives across the development team.
- Partnered with product, QA, and security stakeholders to deliver high-performance financial applications and address critical security vulnerabilities.

Software Engineer (Apr 2021 – Sep 2022)

- Designed and implemented microservices and API Gateway integrations, enabling a 50% increase in request volume while improving scalability and system resilience.
- Improved front-end performance through Angular optimization techniques, including lazy loading and code splitting, reducing page load times by 40%.
- Collaborated with Agile teams to deliver high-quality software releases, achieving a production bug escape rate below 5% through rigorous testing and code reviews.

EDUCATION

Bachelor of Technology (B.Tech.) in Information Technology

Jawaharlal Nehru Technological University Hyderabad (JNTUH)

2016 – 2020

CERTIFICATIONS

- Post Graduate Program in Java Full Stack Product Engineering | Nov 2020 – Apr 2021
- Cisco Certified Network Associate (CCNA) | May 2020
- Oracle Structured Query Language (SQL) Certification | Mar 2019
- Core Java Professional Certification | Mar 2018
